PROJECTS

FashionHub - Fashion E-Commerce Platform (SLIIT)

- Created a comprehensive e-commerce platform with features such as salon management, financial tools, real-time inventory updates, budget planning, review monitoring, order management, automated customer support, and accessories & footwear inventory control.

Tech Used: MERN Stack, Tailwind CSS, Docker, Jenkins, AWS

AUTONATION - Car Buying and Selling Platform

- Built a platform to simplify car buying and selling with features like an intuitive car listing interface, advanced search functionality, responsive design, and detailed seller profiles to enhance user experience.

Tech Used: Python, Django, Bootstrap, SQLite

Go Tours - Tours and Travel Management System

- Developed a PHP and MySQL-based system to streamline travel bookings. Key features include tour package management, secure PayPal payment integration, a user-friendly admin panel, and robust user authentication.

Tech Used: HTML, CSS, PHP, MySQL, Bootstrap

Little Lemon Booking Website (META)

- Developed a booking application for Little Lemon, a Mediterranean restaurant, as part of Meta's Coursera Front-End Development course. The application showcases React proficiency through dynamic components and interactive features.

Tech Used: React, HTML, CSS

G-Films - Movie Trailer & Review Platform

- Developed a web application for discovering and watching movie trailers, allowing users to leave reviews, and create a personalized wishlist. The platform enhances user engagement by providing an interactive experience for exploring movies and staying updated with the latest trailers.

Tech Used: React, Java Spring Boot, Docker
